## Project Details:

**Project title:** Water cooling technology for cpu

**Project duration:** 2016 to 2019

**Project Status:** active

**Team Size:**3

**Project Description:**

this project is about water cooling technology where we are cooling the processor with water using water block placed on the processor to reduce the heat now a day gamers are more interested in computer gaming and there are lots of high end processor like from intel(generation 1-8) i7,i5,xeon, and from AMD RYZEN CPU and FX series CPU but in INDIA the cost of water cooling and liquid is so high, we made a new product which is less in cost and decrease the temperature of the CPU making it stable. run at low temperature and gains a 5% of fps boost in gaming and increses the life of the processor.

**EVENTS/SEMINARS/WORKSHOPS/PRESENTATIONS:**

- Attended workshop on IOT
- Certification of participation in events conducted by college

**Personal Details:**

**Date of Birth :** 12 July 1996

**Languages :** English, Hindu, Telugu
